

EOS Chapstick Repair

This guide will teach you how to fix an EOS chapstick by using a few simple, household tools.

Written By: Michaela Alexander

INTRODUCTION

Prior to beginning this fix, you will need to gather necessary materials and supplies. Also take precaution when handling hot, melted chapstick!

TOOLS:

- [melted EOS chapstick](#) (1)
 - [Butter Knife](#) (1)
 - [Spoon](#) (1)
 - [microwaveable bowl](#) (1)
 - [Microwave](#) (1)
 - [freezer](#) (1)
-

Step 1 — EOS Chapstick Repair

- Open your broken/melted EOS chapstick.

Step 2

- Use a spudger to scrape out the chap stick pieces.
- Pry out the middle divider.

Step 3

- Place the chapstick pieces into a microwavable bowl.

Step 4

- Melt the chap stick pieces in a microwave for 30 second increments or until completely liquid.
- **CAUTION:** the heated liquid may be hot to the touch.

Step 5

- Pour the liquid chapstick into the top of the EOS container and screw on the divider.

Step 6

- Freeze the liquid in the EOS container for 20-30 minutes or until solid.

Step 7

- Screw the EOS container back together and enjoy your chapstick!

To reassemble your device, follow these instructions in reverse order.
